Technical Data Sheet

SIPOLPRENE® 35195

DESCRIPTION

SIPOLPRENE® 35195 is an ether ester thermoplastic elastomer (TPC-ET), developed and manufactured by Sipol, with a nominal hardness of Shore D 36, a low modulus, and a rheological behaviour, which makes it suitable for injection molding and extrusion processing.

SIPOLPRENE® 35195 comes in a natural colour with a standard stabilisation package, fully in compliance with American FDA and European EU 10/2011 Food Contact Regulations. Black colour and/or UV stabilised and/or heat stabilised are all available in dry blend version on request.
